

MARY ENIOLA OLALERE

Data Analyst | Machine Learning | Artificial Intelligence

Nigeria • [Email](#) • 07049266664 • [Portfolio](#) • [GitHub](#) • [LinkedIn](#)

Data Analyst with hands-on experience developing customer analytics projects, interactive business dashboards, and predictive machine learning models using Python, SQL, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, statistical analysis, data visualization, feature engineering, and transforming complex datasets into actionable business insights.

AREA OF EXPERTISE

Python • SQL • Microsoft Excel • Power BI • Pandas • NumPy • Scikit-learn • Jupyter Notebook • MySQL Workbench • Data Cleaning • Exploratory Data Analysis • Data Visualization • Dashboard Development • Statistical Analysis • Feature Engineering • Predictive Modeling • Machine Learning • Business Intelligence • Problem Solving • Communication • Collaboration • Attention to Detail

PROJECTS

Customer Analytics & Spending Prediction

July 2026

Python | Pandas | Scikit-learn | Matplotlib

- Cleaned and prepared a customer dataset by handling missing values, engineering new features, encoding categorical variables, and standardizing numerical data to create a reliable dataset for analysis and predictive modeling.
- Performed exploratory data analysis to uncover customer purchasing behaviour, spending patterns, loyalty trends, and regional insights through statistical analysis and data visualizations.
- Developed and evaluated multiple machine learning regression models to predict customer spending, comparing model performance using R^2 , RMSE, and MSE before recommending the most effective solution for business decision-making.

Sales Analytics Dashboard

June 2026

SQL | Power BI

- Cleaned, transformed, and analysed transactional sales data using SQL, applying joins, window functions, aggregations, and customer segmentation techniques to prepare accurate reporting datasets.
- Designed an interactive Power BI dashboard featuring KPIs, revenue trends, customer demographics, product performance, and regional sales analysis, enabling users to monitor business performance through dynamic visualizations.
- Presented data-driven insights and business recommendations by identifying top-performing products, customer segments, seasonal trends, and revenue opportunities to support strategic decision-making.

Business Data Analysis & Reporting

May 2026

Microsoft Excel

- Cleaned and standardized raw business data using Excel functions, data validation, duplicate removal, formatting, and quality checks to improve data consistency and reporting accuracy.
- Built PivotTables, Pivot Charts, and interactive summaries that transformed large datasets into clear business reports, making trends and performance metrics easier for stakeholders to interpret.
- Produced organized analytical reports highlighting key findings and recommendations, improving the efficiency and reliability of business reporting processes.

PROFESSIONAL EXPERIENCE

BSG (Forage)

July 2026

Data Science Job Simulation

- Completed a virtual data science consulting simulation focused on solving real-world business problems through data-driven analysis and strategic recommendations.

- Applied analytical thinking to interpret business scenarios, identify key challenges, and recommend practical solutions based on available data and evidence.
- Presented findings in a clear, stakeholder-focused format, demonstrating the ability to communicate technical insights effectively to support business decision-making.

Freelance Data Analyst

Jan 2026 – Present

- Delivered end-to-end data analysis projects using Python, SQL, Excel, and Power BI, including data cleaning, exploratory analysis, dashboard development, and business reporting.
- Worked with diverse business datasets to identify trends, measure performance, and generate actionable insights that support informed decision-making.
- Built interactive dashboards and visual reports that transformed complex datasets into clear, easy-to-understand business intelligence for clients and portfolio projects.

EDUCATION

University of Ibadan

March 2022 – January 2026

B.Sc. Agricultural Economics

PROFESSIONAL DEVELOPMENT

- Professional Certificate in Data Science
ALX Africa | 2025–2026
- Professional Certificate in Python Programming
ALX Africa | 2025
- Professional Foundations Program
ALX Africa | 2025
